PROFILE SUMMARY

MCA student and full-stack developer who enjoys turning real-world problems into working apps. I have built and shipped projects across **web, Android and machine learning**, and I use AI tools to learn faster and build better. A quick learner and team player, looking for an **internship or entry-level developer role** where I can contribute and keep growing.

EDUCATION

Master of Computer Applications (MCA) | St Aloysius (Deemed to be University), AIMIT, Mangaluru — Jul 2025 – Expected 2027
Bachelor of Computer Applications (BCA) | Shivaji College, Karwar · CGPA 8.2/10 (Distinction) — 2023 – May 2025

TECHNICAL SKILLS

Programming Languages: TypeScript (basic), Python, Kotlin, SQL
Web Technologies: HTML, CSS, React, JavaScript, Angular 19, Flask
Databases: MongoDB, MySQL, SQLite
Core Concepts: Object-Oriented Programming, Data Structures, ADBMS
Technologies: Linux (Ubuntu), Machine Learning (Fundamentals)
Developer Tools: VS Code, Android Studio, Git/GitHub, Vercel

INTERNSHIP EXPERIENCE

AI/ML Intern — Jan 2025 – Mar 2025
ZetaCoding Innovative Solutions — Remote / Karnataka

- Built Flask web applications in Python with page routing, database connections and reusable backend code for an AI/ML project.
- Connected ML models to the web app and debugged issues end to end, from data handling to the final output.

PROJECTS

TaskFlow | Project & team management platform — code ↗
Angular 19, Express 5, MongoDB, Socket.IO, Chart.js, Claude API

- Built a team project manager with a drag-and-drop Kanban board, calendar, dashboards, reports and file sharing (**47 REST APIs**).
- Added secure login (JWT, hashed passwords) with **separate roles** for Admin, Project Manager and Member.
- Added real-time team chat and live board updates using Socket.IO, plus AI-generated project summaries and priority hints.

CrowdMate | Virtual queues & lost-person safety tags (PWA) — code ↗
React, TypeScript, Node.js, WebSocket, IndexedDB, Vitest, Playwright

- Visitors scan a QR code to get a live queue token; if a child or elder gets lost, the finder can alert the family privately.
- Works even on weak or no internet: actions are saved on the phone and synced automatically when the connection returns.
- Tested with **69 automated tests** (Vitest, Playwright), including accessibility checks.

Paroh | Offline-first personal journaling app — code ↗
Electron, React, TypeScript, SQLite, Capacitor

- One codebase that runs on desktop (Electron) and Android (Capacitor); journal entries are saved as simple files the user owns.
- Safe saving so entries are never lost, plus fast full-text search across all entries using SQLite.
- Optional AI features (monthly summaries, voice notes to text) and installers for Ubuntu and Windows.

PixelStore | Full-stack gaming e-commerce store — code ↗
React, Node.js, Express, MongoDB, JWT, Framer Motion

- Online store with cart, checkout, order tracking, wishlist, reviews and an **admin dashboard** to manage products and orders.
- Prices are checked on the server and stock is locked during checkout, so two buyers can't purchase the last item.

Qualify Milk | ML milk-quality grader — code ↗
Python, scikit-learn, Flask, SQLAlchemy, pandas

- Trained and compared **10 ML models**; found that most dataset rows were duplicates and tested fairly on unseen data (88% accuracy).
- Flask web app where users move sliders to get a live prediction with a simple explanation, plus login and saved history.

Also built: HabitTracker, a native Android app (Kotlin, Jetpack Compose, MVVM, Room).

SOFT SKILLS

Problem Solving · Adaptability · Self-learning · Communication · Team Coordination · Attention to Detail

INTERESTS & LANGUAGES

Interests: Fitness, Workout and Sports
Languages: English, Hindi, Konkani

DECLARATION

I declare that the above information is true and correct to the best of my knowledge. **Siddharth Bhat**
